

## Bias comparison of different models: MCAR\_45

```
source("../utils/compute_bias.R")
data_name = 'MCAR_45'
n_imputations = 10
```

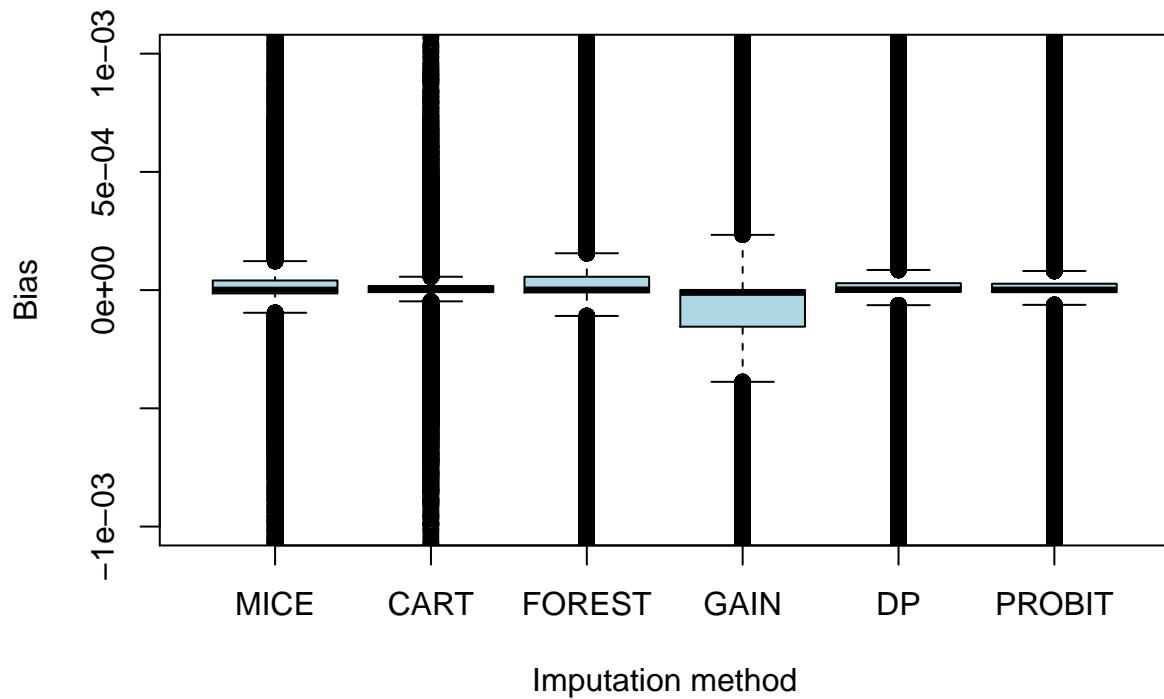

**Bias from different imputation methods: Univariate pmf**

**Bias from different imputation methods: Bivariate pmf**

**Bias from different imputation methods: Trivariate pmf**

### Bias from different imputation methods: Quadvariate pmf
